

# Laurencekirk Primary School

## First Level Home Activities (P2-P4)

### **Sum Builder**

Make and solve your own addition and subtraction sums using items you find in your house or garden.

### **Teach your Teacher**

Choose a topic that you are an expert in. Create a poster, PowerPoint or Fact Sheet to teach your teacher all about this topic. Then create a quiz to test them.

### **How strong is a shape?**

Bridges often use cylinders for the supports but are they really the strongest shape? Put this to the test by creating 3 towers: a circle, a square and a triangle using paper and sticky tape. Guess which one you think will be the strongest then add a book, one at a time, until it collapses. Count the number of books to find out which shape was the strongest. Now design and make a bridge using the strongest shape for the columns.

### **Mindful Nature Hunt**

Draw or write a senses nature hunt for your family to do on a walk. List things for them to see, smell, hear and feel.
