Toy Shop Wheel Challenge

This toy shop sells race cars and tricycles. Race cars have 4 wheels and tricycles have 3 wheels.

You counted all the wheels in the toy shop and got the total of 45 wheels.

How many race cars are in the shop?

How many tricycles are there?

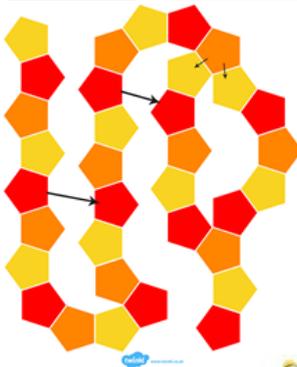

Random Act of Kindness

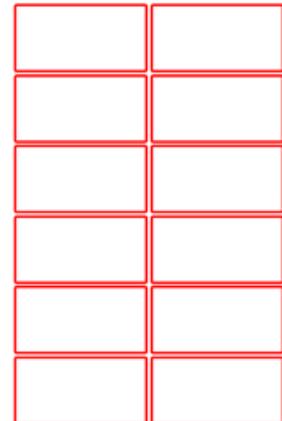

Help to clear up and wash the dishes after dinner.

Make Your Own Game

Think of an idea and make a board game that you can play with your family. Is your board game going to have a special theme? Are you going to use cards to tell players what to do or does the playing board tell them? Are you going to use a dice or will your cards tell players what moves they need to make?

Once you have made your board game draw or write instructions so that all the players know how to play. Remember that your drawings or writing will have to be in a list so that other people can follow your instructions and play the game even if you are not playing.
